Final draft
Advanced organizer
Overview of the content of the material
1. Context
Brief theoretical background and visualization
Possible application of the context in school
Taking the role of a teacher
2. Alignment with chemistry class
Which important inquiry methods are taught in the analysis?
Relevance for teachers
3. Inquiry methods
2. Alignment with chemical industry
Taking the role of an employee
Connection between context and the inquiry methods needed in chemical industry
3. Inquiry methods
Relevance for chemical industry
Which important inquiry methods are taught in the analysis?
4. Preparation tasks
Reflection of the inquiry methods for the analysis in the lab
Flowchart
Visual connection between contextualized pre-lab materials and traditional analysis in the lab
Traditional laboratory manual
